Tables 1A and B set out the coding schemes for self-rule and shared rule, which together constitute regional authority. Table 2 aggregates scores for all regional units to the country level for 42 countries. Eight dimensions of regional authority are coded on an annual basis for years in which a country was independent and (semi-)democratic from 1950 to 2006. The algorithm for combining regional scores is described in Hooghe *et al.* ('Operationalizing Regional Authority ...', this issue, pp. 123–142).

Table 3 provides disaggregated scores—scores for all regional levels below the national level having an average population greater than 150 000, scores for asymmetrical arrangements and scores for special autonomous regions. The population of countries/years is the same as for Table 2.
